D2P Division Overview

Design2Play is our Product Division with over 22 years in the Entertainment and Water Park Industry. Taking raw materials and turning them into something everyone can enjoy was, and still is, the ultimate reward for our efforts. We have a passion for what we do and we approach every project like it's going to be the best one ever! We've been told the excitement and enthusiasm we put into our work is refreshing and infectious.

FUN MANAGEMENT SYSTEM - FMS (Optional):

The Fun Management System offers state of the art PLC control for your attraction. Our flexible system allows stag to easily change on/off times, delay times along with features like 'Attraction mode', on screen testing and enable/disable modes. The control box features a touch screen for easy program changes. We will work with you to select the features/effects that best enhance the customer experience and create the ultimate control package for your attraction. There is also the capability for remote access thru you PC or mobile devices (password protected). From top to bottom we use the highest quality solenoid valves and electronic components available to ensure you get a system that is very dependable and low maintenance.

THEMING - We offer complete Theming Services to enhance or brand any of our features. From Thematic Paint Work to full 3D Sculpted Elements and everything in between. We can build from your designs or we can create a theming package with you. Theming is a great way to add the "WOW FACTOR" to your attraction that will set it apart from the crowd and creates lasting memories that will keep your guests coming back for more. We've done custom theming work with Legoland and Lego Discovery Centers, Six Flags Amusement parks, Water World Water Park, Crayola Experience, Great Wolf Lodges, Kalahari Resorts and Moody Gardens.

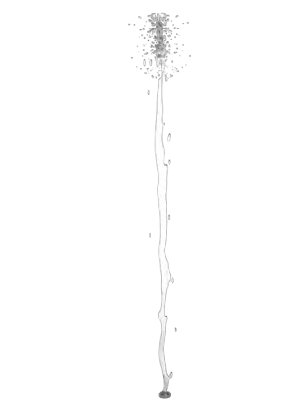

WATERFORMS™

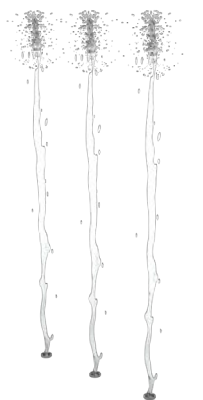

design2play
a weber group
company

Water Forms - The following products represent a Dynamic collection of 40+ Active and Interactive Water Features made for Shallow Depth Pools and Wet Decks. From more than 22 years of experience in the industry, we've selected the perfect combination of proven and new products blended together in a fresh way that is 100% FUN! Our Water FORMS elements range in size from a Single Pop Jet all the way up to our Super Tower Centerpiece that delivers a 400 gallon deluge and everything in between. These features create the foundation of our 'Interactive World.'

EXPLORERFORMS™

design2play
a weber group
company

Explorer Forms - Our ExplorerForms product line sets the new standard in Multi-Level Water Play. We offer a huge array of both passive and interactive water features creating endless configuration possibilities. Choose from our standard EF Models or we can design something totally custom to fit your specific theme or site condition. All models are designed for maximum safety, fun, performance and are easy to maintain. We only use the best materials available. All 304/304L SS structural components and features, Azek composite decking for Decks and Stair treads so water drains through and circulates under the deck. All skirting is made from 1/2" solid color Playground Panels with vent/circulation slots. We offer several rail in-fill styles including; 1/2" clear acrylic, 3/4" custom designed playground panel inserts, 5/8" SS round pickets and 2 x 2 poly netting.

TABLE FORMS™

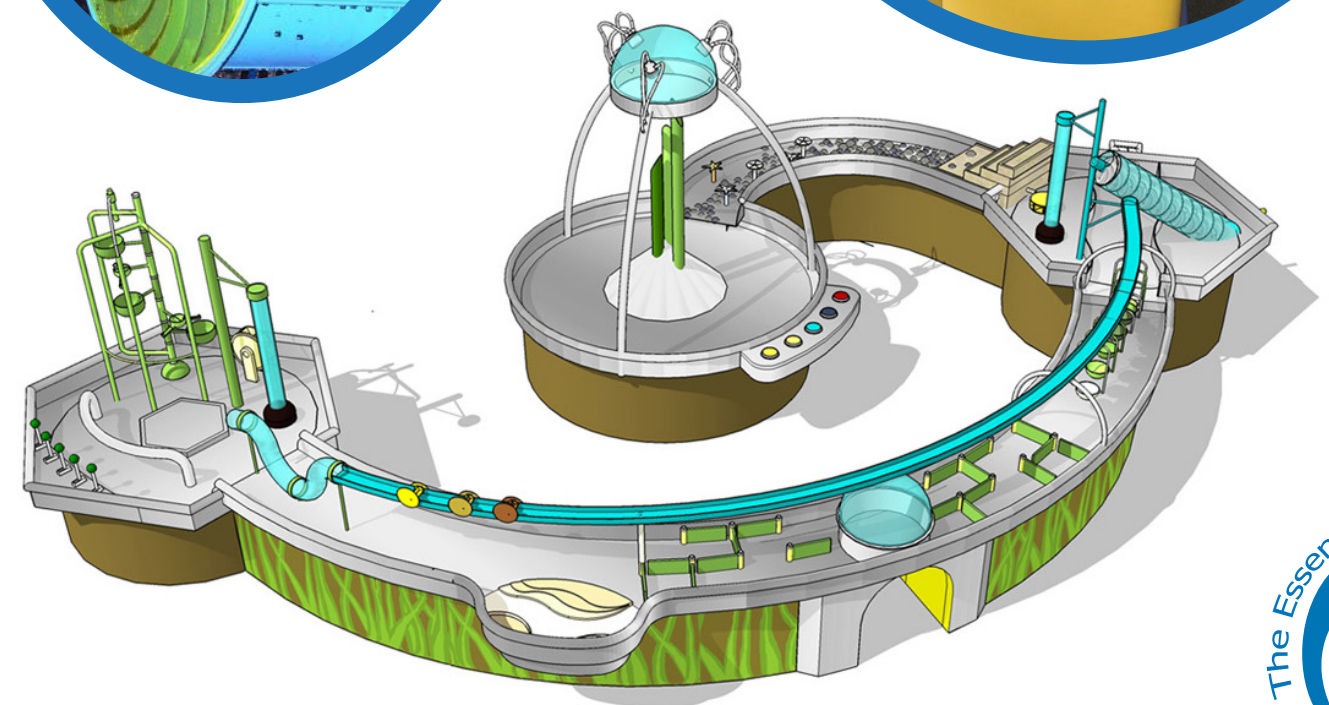

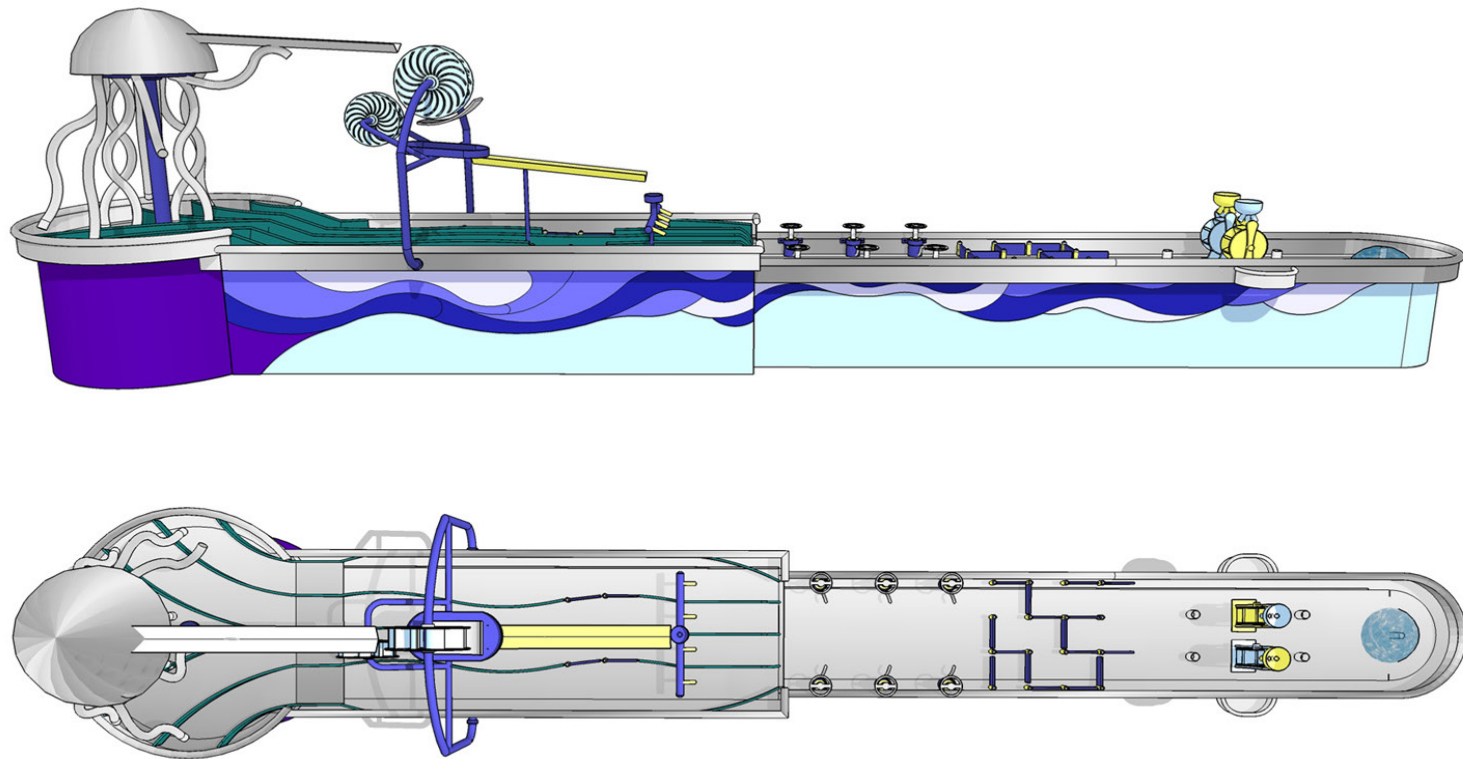

design2play

a weber group
company

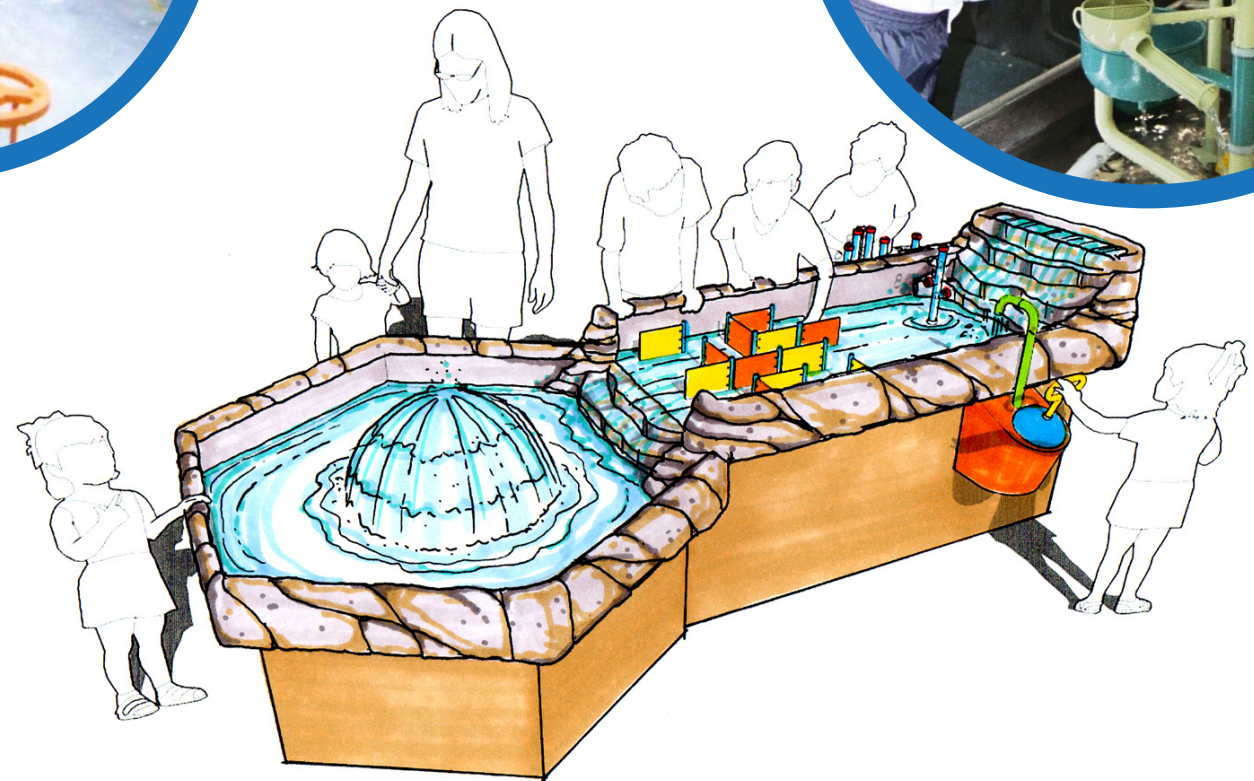

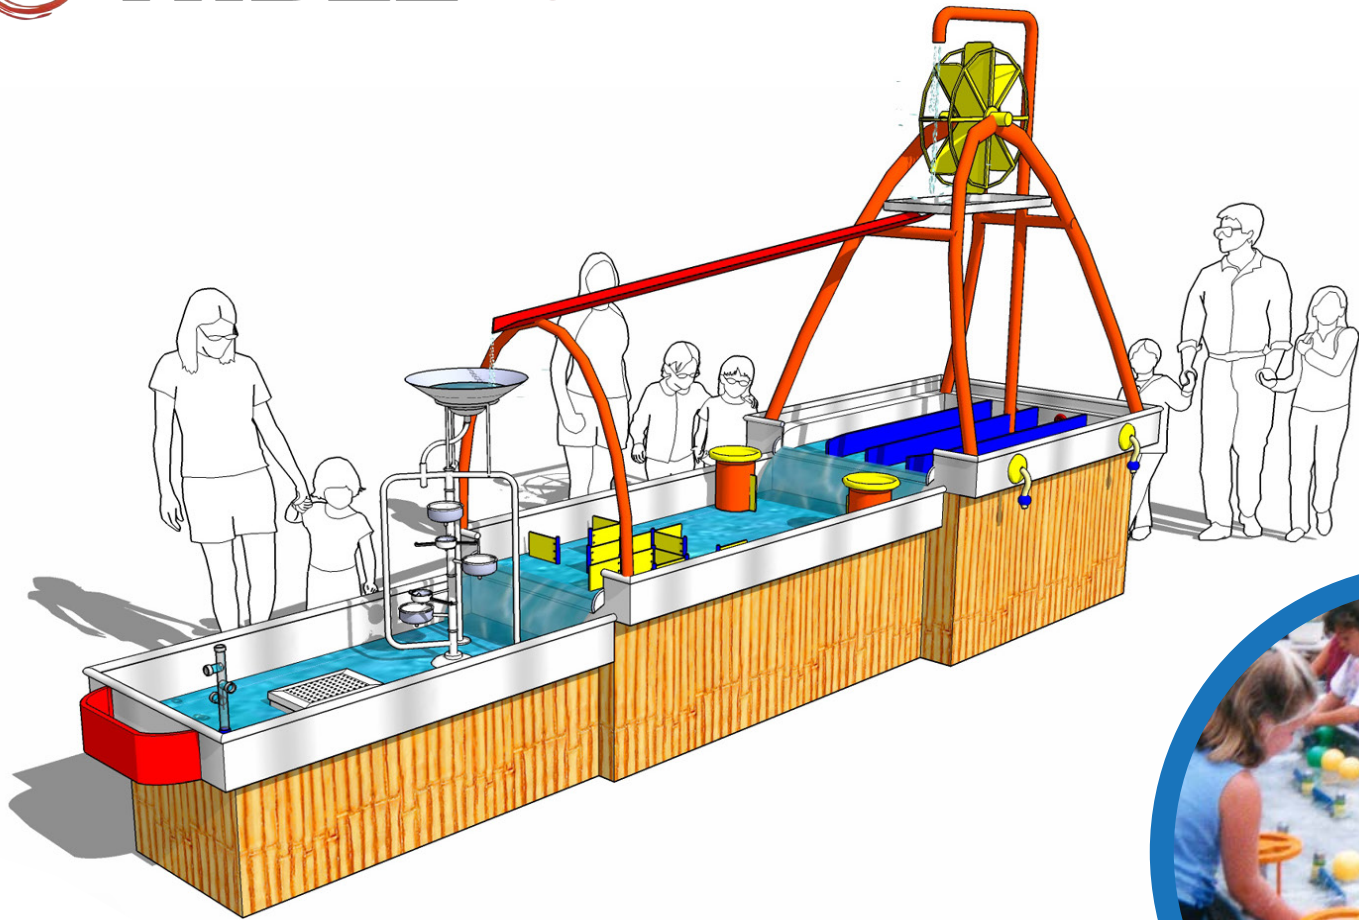

Table Forms - We Love Water Tables and so do our clients. Our Interactive Table Form designs are based on play value, educational content, safety, aesthetics, and durability. The Table Elements can be designed around Educational or Fun programs, but we've found the best projects are a combination of both. This happens when the Educational part is accessed in a fun and engaging way. Kids can work together to move objects and 'make things happen' in a Team environment. Part Science, Part Discovery, Total Fun!

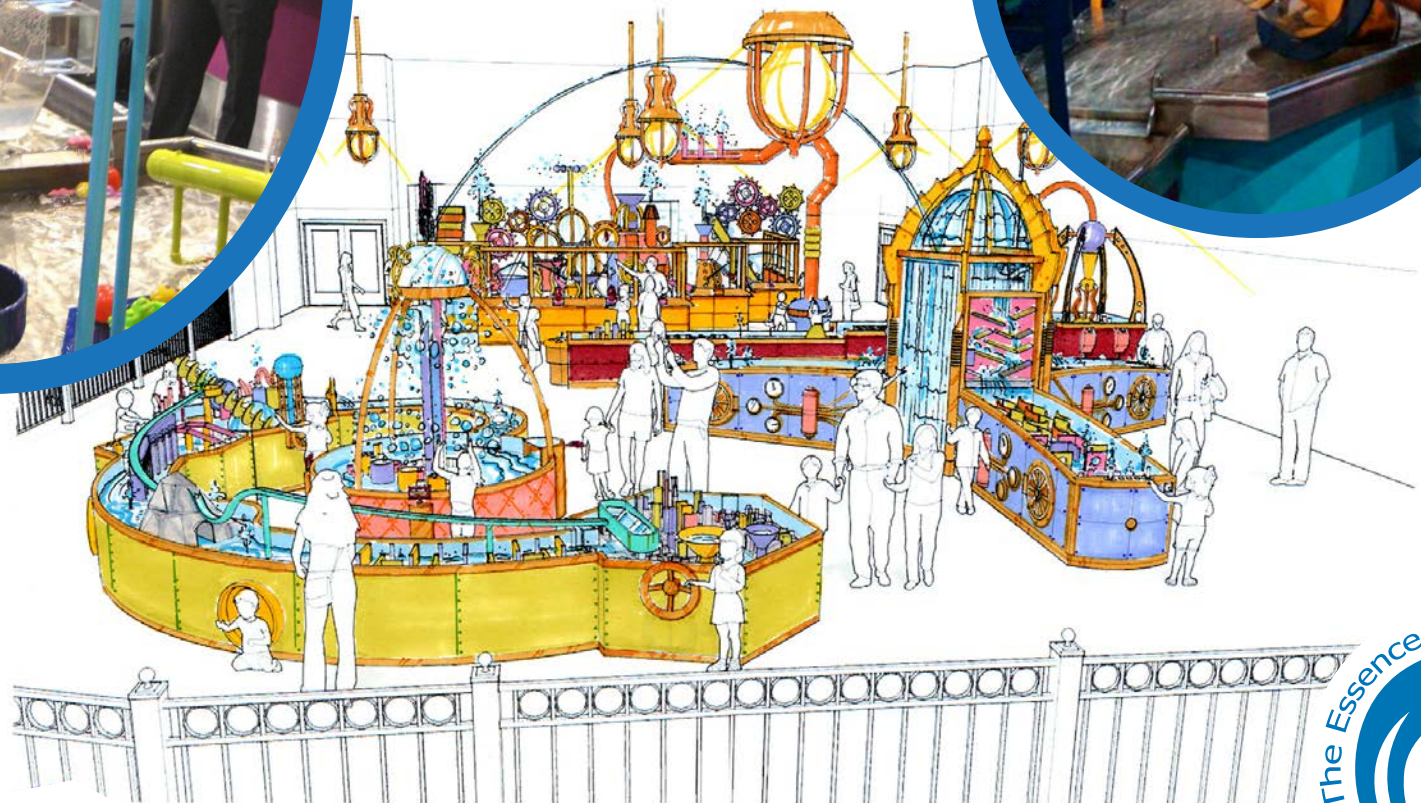

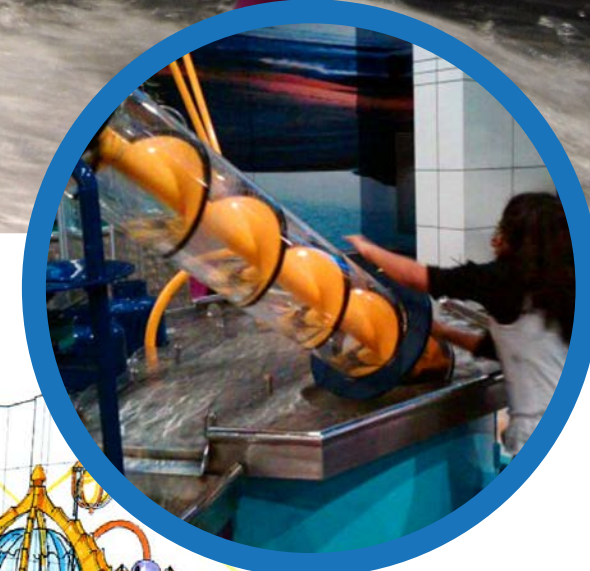

RIVERFORMS™

design2play
a weber group
company

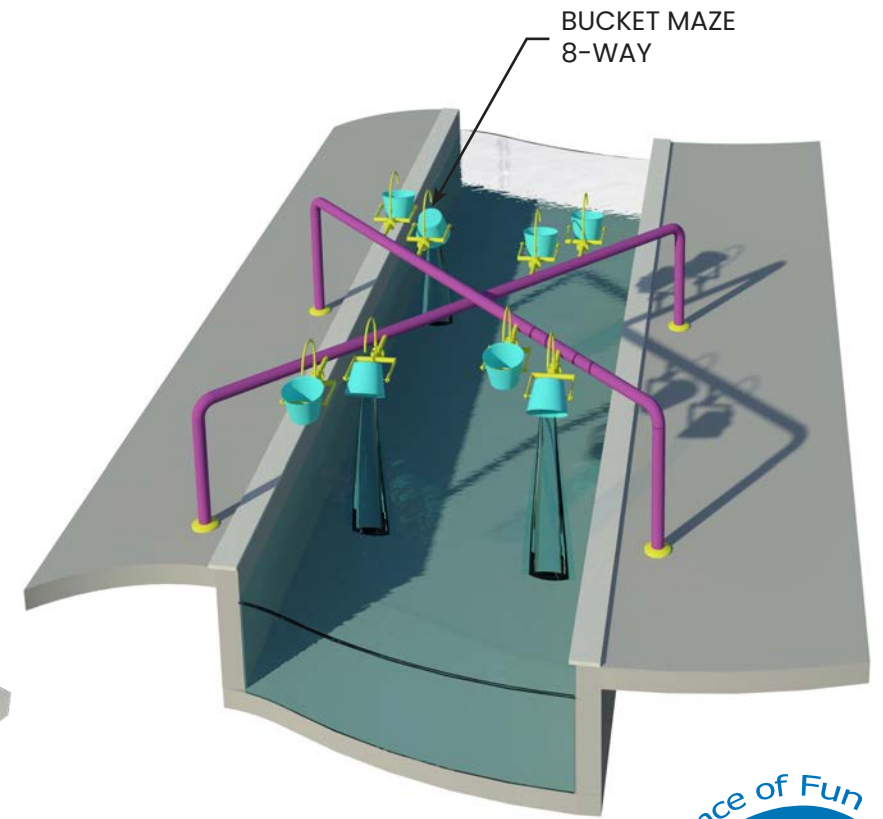

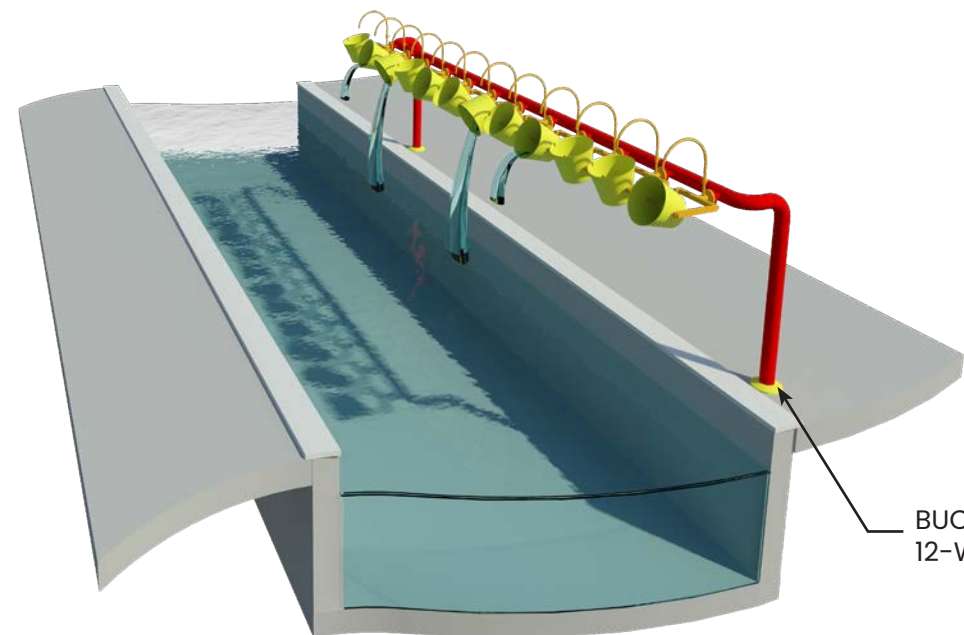

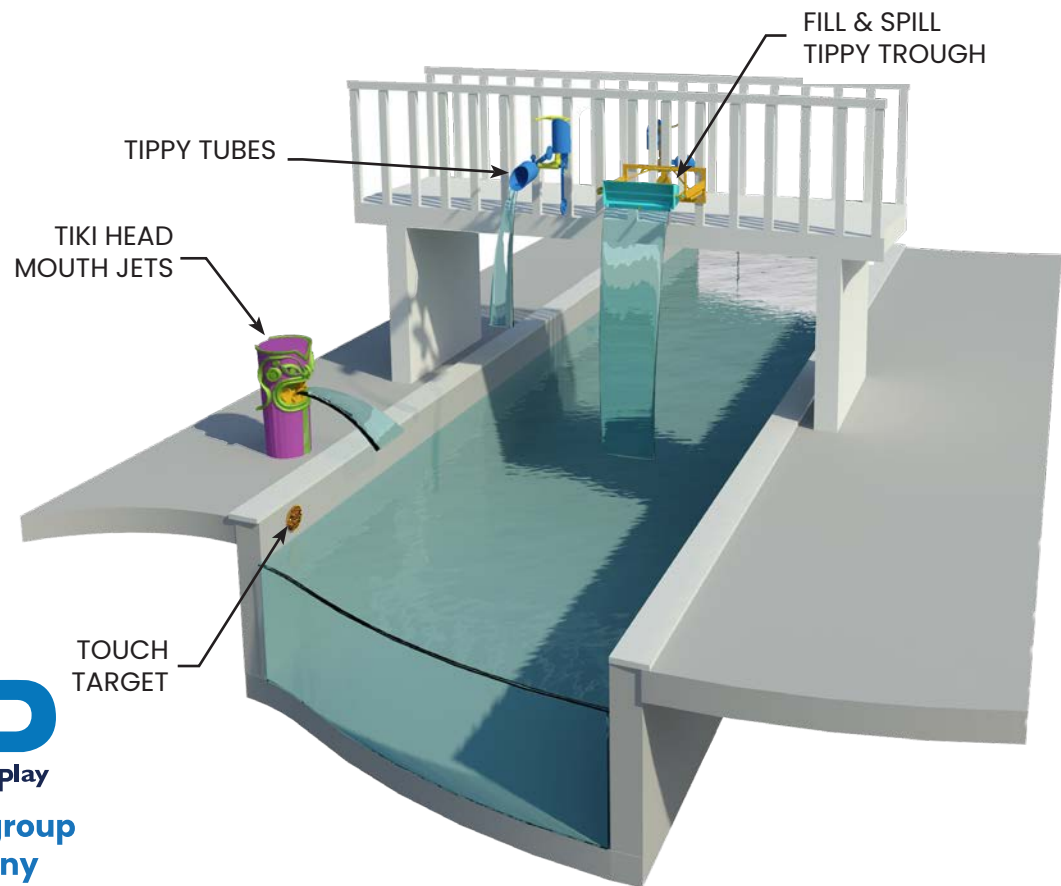

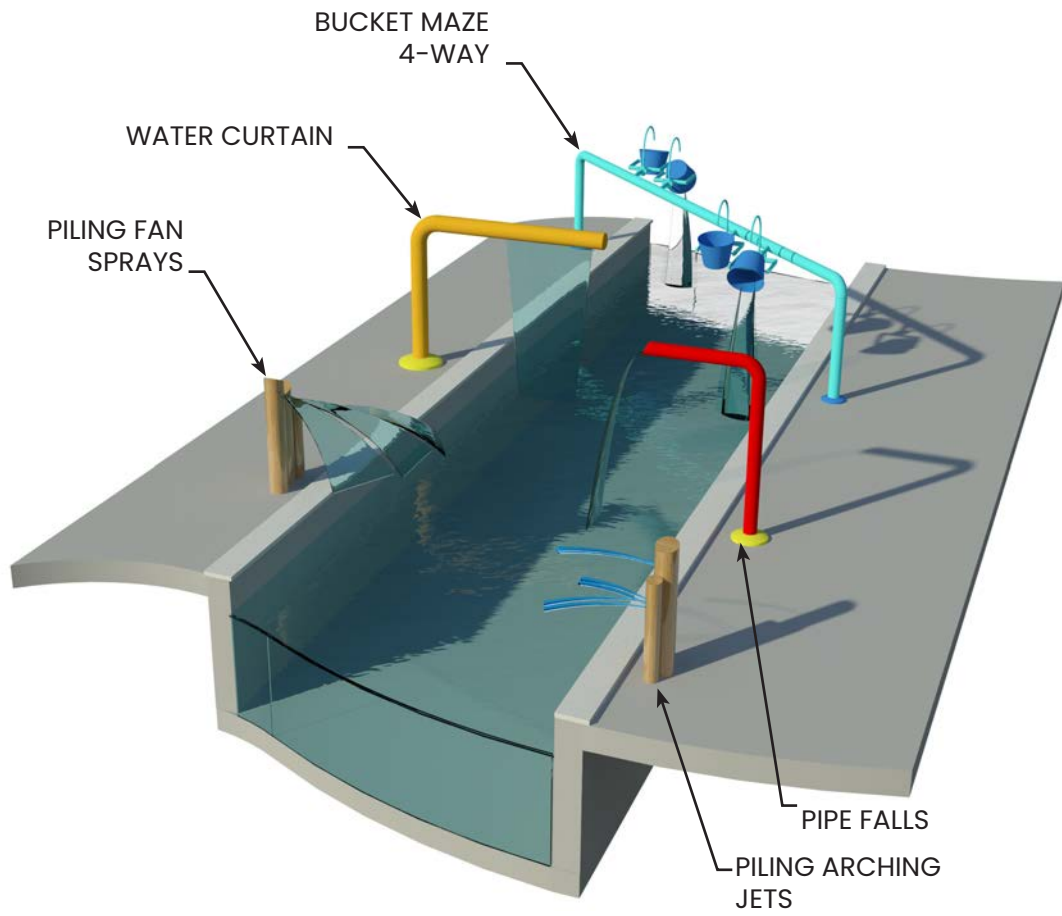

River Forms - A great collection of Passive and Interactive features aimed at adding excitement to your Lazy River without being too aggressive. Our River FORMS Features, big and small, make a great addition to any River. Arching Jets, Fan Jets and Tippy Buckets are only the beginning. Our unique "Splash, Touch and Scream Targets" are real game changers. How about playing 'Limbo' under an invisible beam and surprising your friend with a blast of water when you 'Go-Low' enough! Besides Fun Components, we always provide a 'chicken path' for the not so adventurous guests. They can choose to avoid being sprayed if they just want to lie back and relax around the river.

SCREAM ACTIVATOR CONCEPT

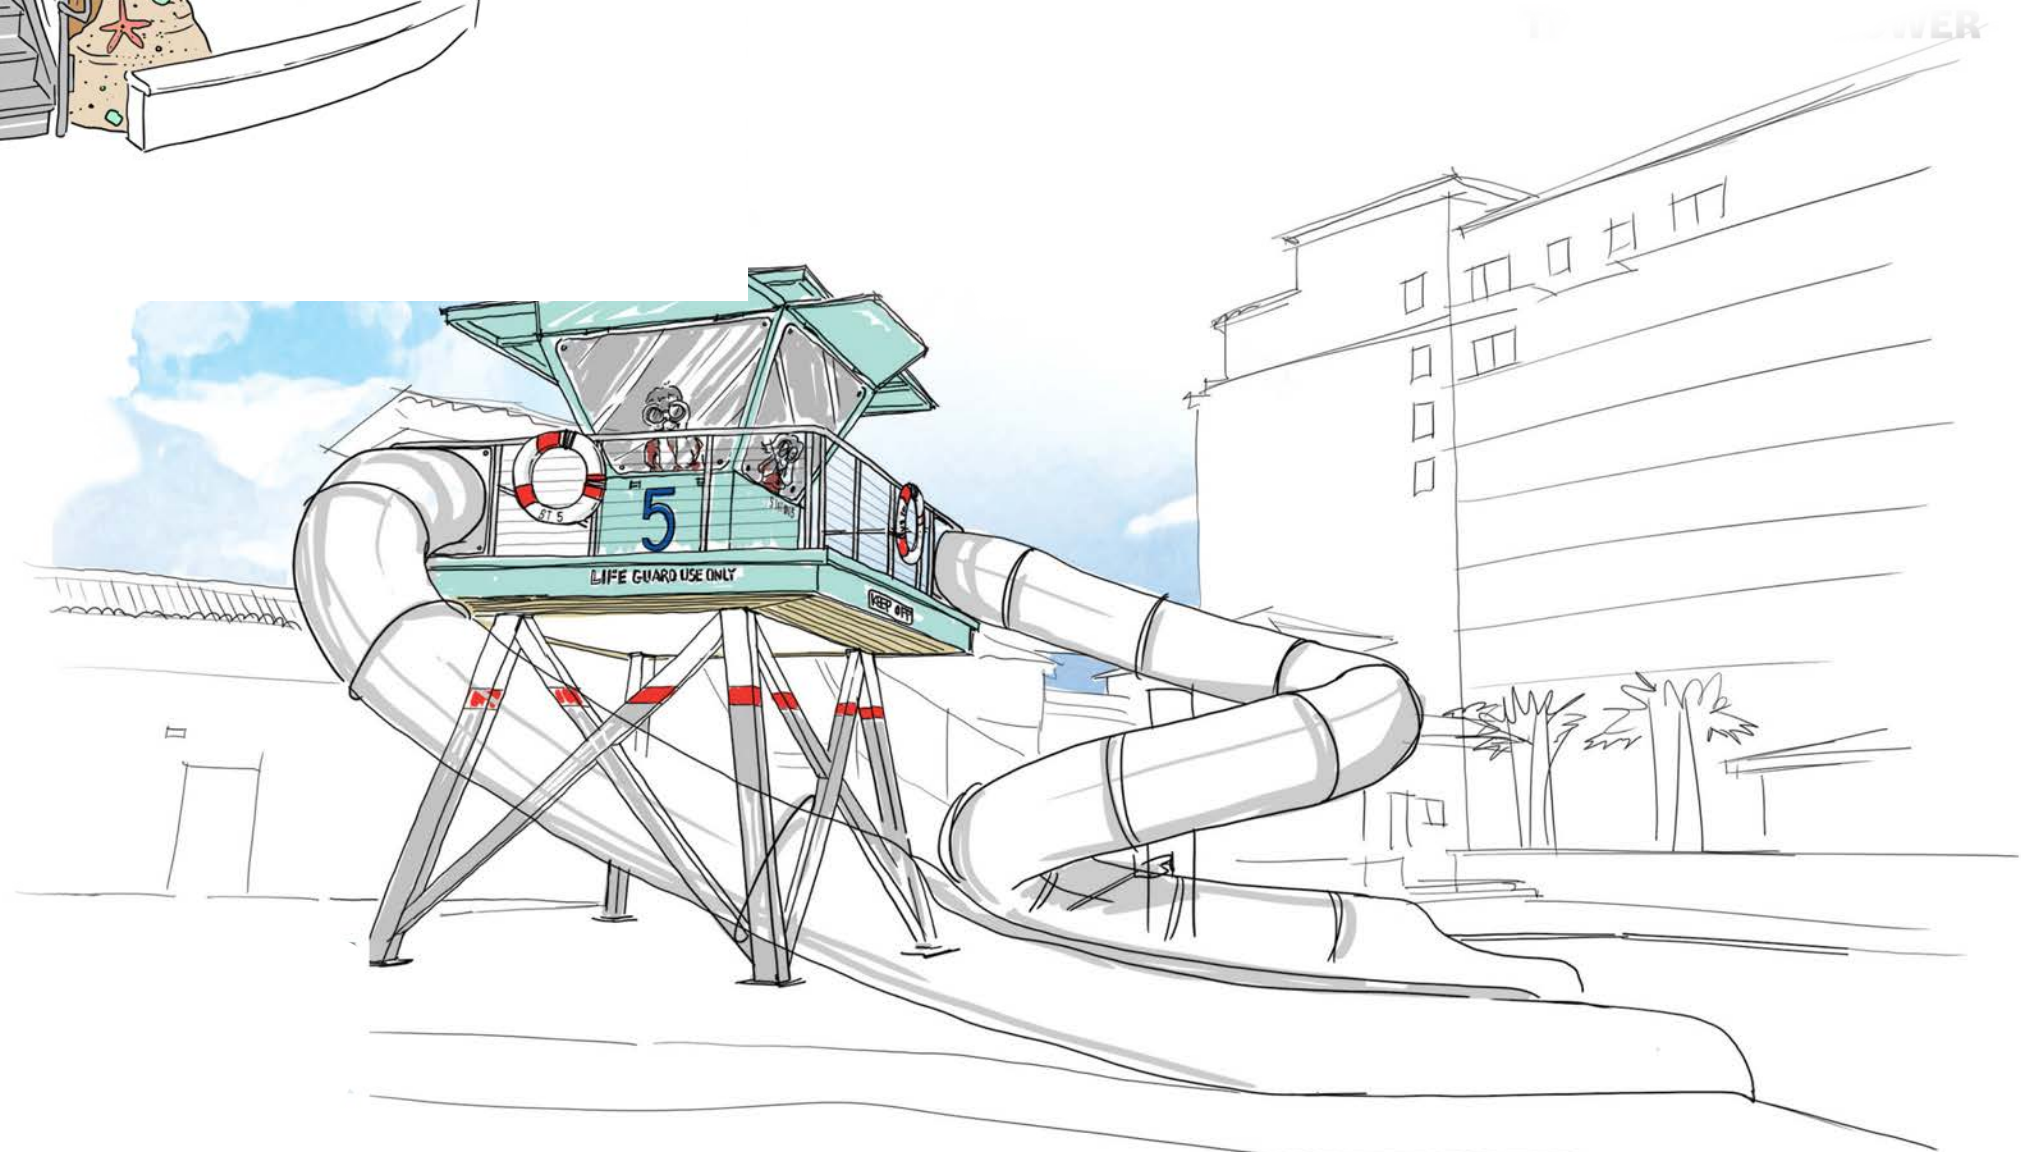

SLIDEFORMS™

design2play
a weber group
company

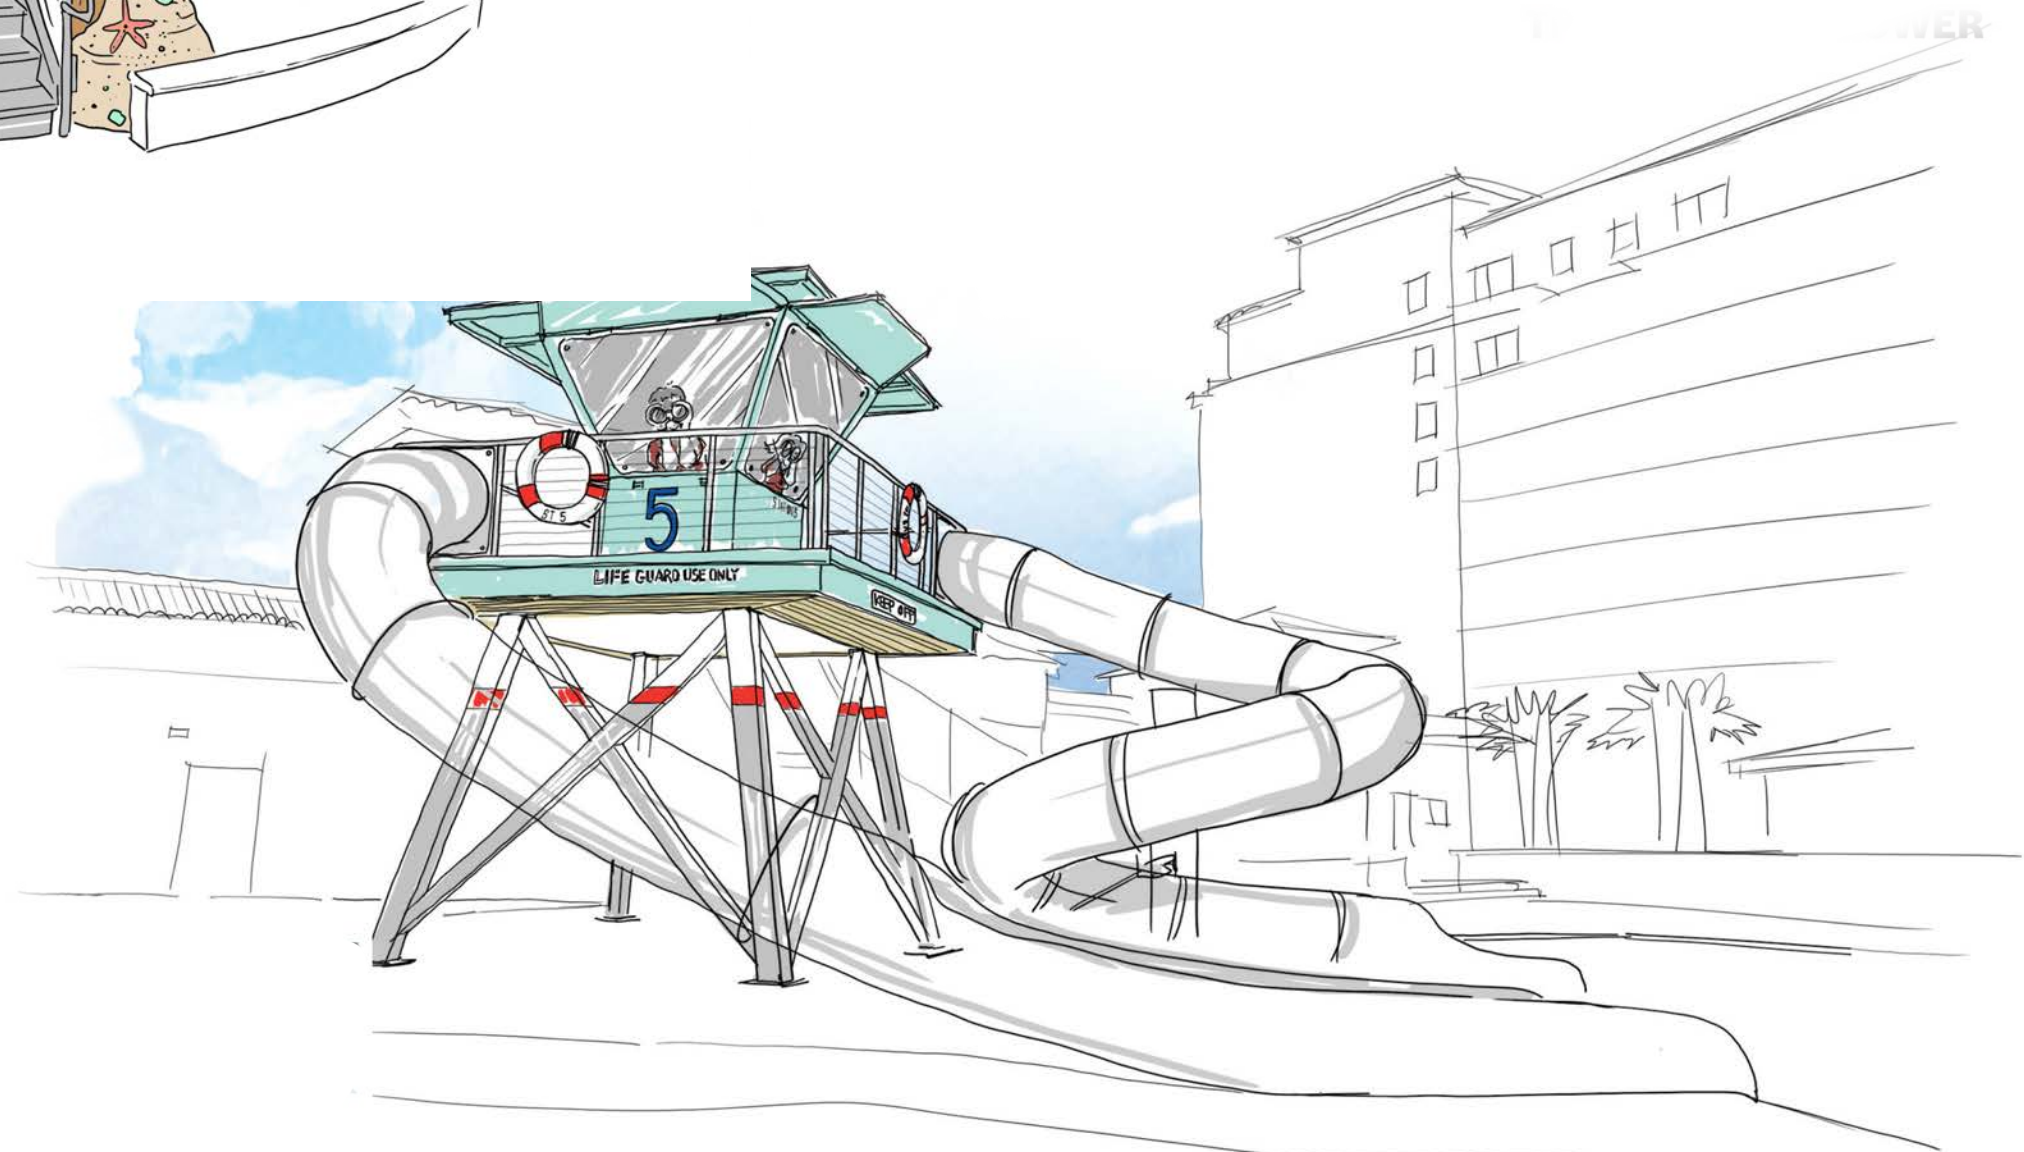

Slide Forms - Our Themed Water Slides deliver the 'BIG WOW' that will take your water attraction to the next level. We offer themed kiddie slides, standalone water slides-towers and large open and enclosed body slides for our Explorer Forms water play structures. The kiddie slides can be custom designed and fabricated to match any shape, style and theme you can imagine. Our waterslides and towers are super durable and low maintenance. The fiberglass slides match or exceed the highest industry standards. We also offer 'Lite' theming packages that can overlay standard slide towers to add a bold fresh look to the boring old tower.

The Weber Advantage

One Source

Design2Play joined the Weber family to combine innovative water features and world class theming. From fit to finish, we do everything, ensuring our products are perfectly integrated into your environment.

Always On-Call

Our Comprehensive Maintenance Program includes:

- Spring Start Up
- Mid-Summer Tune Up
- Fall Close Down and Winterizing
- Complete Diagnostic On-Site Inspection, including reports and recommendations

User-Friendly

- Non-proprietary software and components that are easy to acquire and swap out.
- Feature program times that can easily be changed by the maintenance staff with a few keystrokes.
- Programmed daily start up and shut down times that can be adjusted.
- Network connected system, so we can troubleshoot remotely.
- Smart phone to control box linking available.
- No down time due to a failed valve or control box. Our plumbing system is designed with by-pass lines, so operators can simply turn off the main line to the feature and open the bypass, allowing features to run continually until the problem can be addressed.
- Each feature has its own water feed to the SS manifold(s), allowing each effect to be adjusted individually.
- Manifolds are plumbed in a highly accessible manner for easy adjustments and service.

After the Sale

We provide:

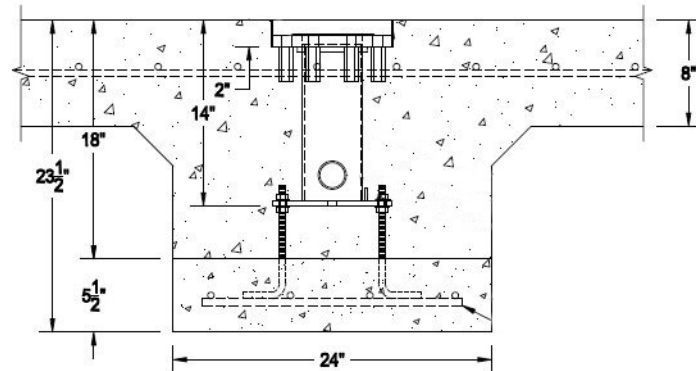

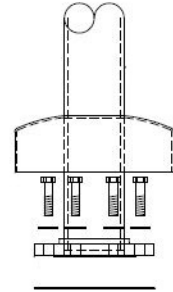

- On-site Operation & Maintenance Training.
- O&M Manual customized for your specific project.
- Care Package, including all the basics of most commonly needed replacement parts and fasteners neatly sorted and easy to find when you need them.
- Customer Service Department - We are always here when you need us.

Contact Weber Group for your Water Play and Theming needs!

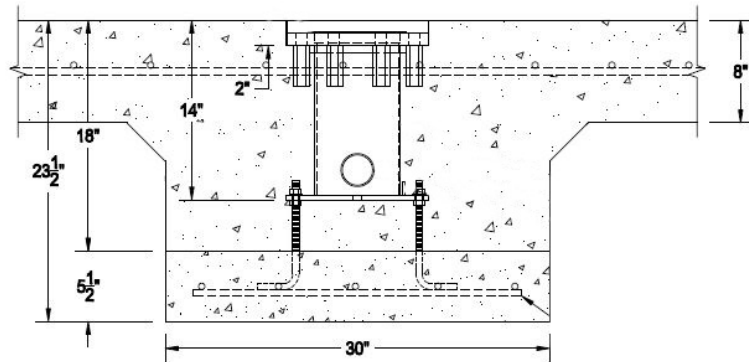

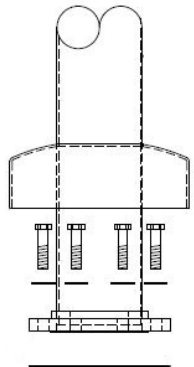

The Weber Advantage

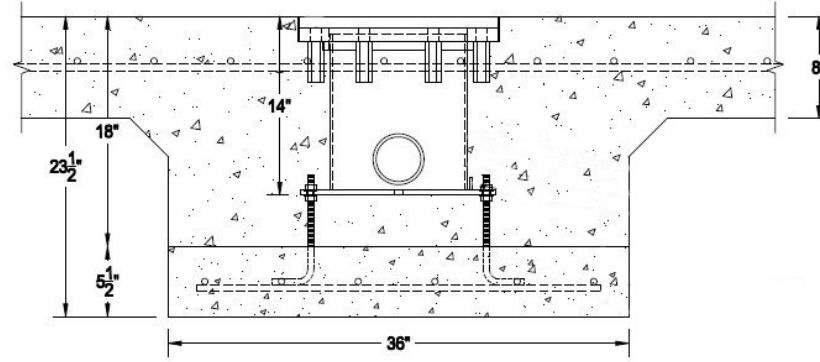

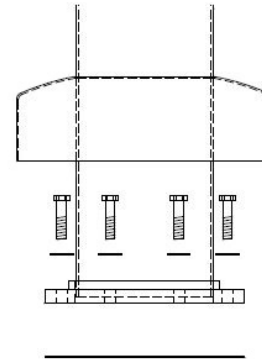

FLEX FORM MOUNTS

A SMALL: FLEX FORM MOUNT
SCALE: 3/4" = 1'-0"

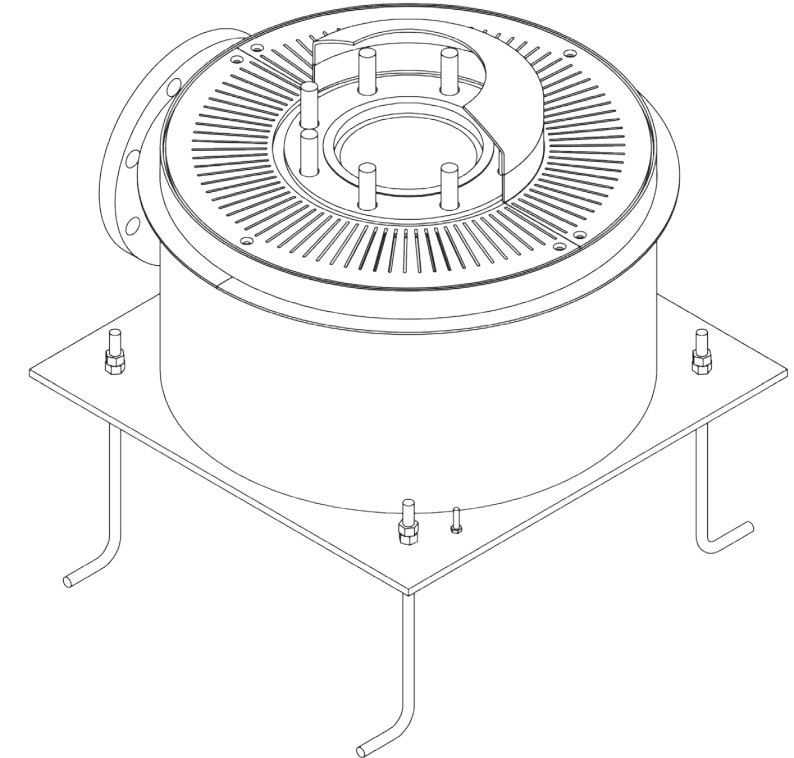

B MEDIUM: FLEX FORM MOUNT
SCALE: 3/4" = 1'-0"

C LARGE: FLEX FORM MOUNT
SCALE: 3/4" = 1'-0"

FLEX FORM DRAIN CANISTER

Our 304/304L Stainless Steel FLEX FORM feature mounting system allows you to add, change and rearrange features with no hassle, any time you want. Once the Mount is installed, you simply add a gasket, bolt down the feature and you are ready to go. You can also remove and store features for the winter and cover the opening with a gasket and plastic cover that provides a flush finish with no protruding hardware. Available in (3) sizes to accommodate our full range of Water Forms spray pad features making your attraction truly 'Swap N' Play'. Any Water Feature in the corresponding size group can be mixed and matched however you want and adding new features is just as easy. We also can adapt any of our features to fit over any other existing features for a seamless transition from old to new!

The Weber Advantage

STANDARD COLORS

All Stainless-Steel surfaces are prepared for finishing by sand blasting, using a chemical wash, and baking process before the powder coat is applied to ensure maximize adhesion. The Powder Coat is TIGER Drylac Series 38 Polyester Urethane Super Durable Powders that are UV and chemical resistant and suitable for public spaces. Besides the visible surface of every feature, we powder coat inside surfaces where practical for added protection.
